

TÜR GON  
LONDON

SPECIALISTS IN  
HANDMADE &  
CUSTOM FINISHED  
FLOORS

## WHY CHOOSE TURGON?

---

Unlike most other trade companies, we are unique in that not only do we produce a huge range of hand finished floors in various dimensions, but we also make floors in our own production facility in the UK.

Our hand finished floors are fully maintainable, making them ideal for all commercial areas such as bars restaurants offices etc.

Our finishes, unlike lacquered or UV oiled finished floors, are simply maintained by cleaning and refreshing with no need for expensive and inconvenient sanding.

---

### HAND FINISHED PLANKS

---

We are specialists in handmade and custom finished flooring.

Selected products are also guaranteed for underfloor heating. Extra long planks of up to 7m in length and 450mm wide are also available.

---

### UNRIVALLED SERVICE

---

Our service is unique. We can send samples to anywhere in the country, as well as provide site surveys on any products you would like us to install.

We offer a full and comprehensive guarantee on all our works.

---

### CUSTOM COLOUR MATCHING

---

We can match to almost any existing colour, or you can choose your own individual colour.

All products are available in any finish, in any size with any colour.

---

### UNDERFLOOR HEATING

Whether you have a wet or electric underfloor heating system, the only products that are fully guaranteed by the manufacturer are EPH certified products.

Although multilayered products can be used in conjunction with UFH and are guaranteed, they are not as reliable as EPH certified products.

Turgon has a huge wealth of experience in the installation of all products with underfloor heating and we have carefully monitored them over a period of time.

In our experience, the only products that are suitable are engineered boards or EPH.

See more about EPH certified products at:  
[www.turgon.co.uk/EPH](http://www.turgon.co.uk/EPH)

### SOLID WOOD

Because of the varying temperatures of the British climate, solid wood flooring is not a great choice.

Only use solid wood flooring if you don't mind movement. This can actually be ideal for the aged and distressed look, or for antique reproduction floors.

Never use solid wood over concrete, or in basements where the presence of damp is a threat.

Solid wood floors are not suitable for use with underfloor heating under any circumstances. Scientifically they will always fail.

For more details see:  
[www.turgonflooring.co.uk/guide/underfloor-heating](http://www.turgonflooring.co.uk/guide/underfloor-heating)

## GRADING RULES

---

### GRADING RULES & SAMPLES

We offer 3 grades of wood :  
Rustic,  
Prime and  
Quarter Sawn.

When you order a sample, please be aware  
it is only a small cross section, and you are  
not seeing all the variations between the  
wood pieces.

To see a fully accurate representation you  
can see a larger selection of samples at  
our showroom.

---

### TÜRĞON SPECIAL FINISHES

We also offer a huge range of custom  
made floors, finishes and surface textures  
in both solid and engineered formats, in  
any thickness and any width.
